I'll take a look, but I have three SF site projects that are breathing down my neck (given the time of year).
How much a rush is Dave in on this?

Craig and Lon –

First, thank you for all the help on responses to comments.

Second, sorry to be a pest. However, I need further assistance on some of the comments related to compliance with EPA Information Guidelines.

Attached is a draft excerpt from the response document that summarizes the comments and a draft response. The draft response is what I would like to say, but I want to make sure it is factually correct. Plus, if there are any

references that could be added to beef up the response.

Thanks. Mosquito season will be over soon (although, I think the wasps will arrive soon)

Dave
